

WELL CONTROL INCIDENT REPORT — GAS KICK (WELL-003)

Well ID:	WELL-003 (Offset Well DGB-88)
Operator:	Oil India Limited
Formation Target:	Barail Main Formation
Incident Depth:	3,220.0 m TVD
Report Type:	Incident Summary Report
Date of Event:	18-Aug-2023

1. Event Summary

Pit volume gain of 22 bbl and standpipe pressure drop observed at 3220m depth in Barail lower coal lens. BOP closed on 5-inch drillpipe. Shut-in SIDPP: 450 psi, SICP: 610 psi.

2. Mitigation Applied

Executed Wait and Weight Well Control Procedure. Weighted mud system from 1.20 sg to 1.30 sg and circulated influx out safely through choke manifold.

3. Final Outcome

Gas kick killed safely with peak casing pressure 680 psi. Drilling resumed after mud weight stabilization.
